**"There is cause to hope, and believe,  
that there can be an end to war."**

—Lt. Col. Dave Grossman, U.S. Army (ret.)

Once in a great while, a book is written that substantially changes the way people think about a particular subject. *Will War Ever End?* is such a book. Written as a "manifesto for waging peace" by an active duty captain in the U.S. Army, *Will War Ever End?*, challenges readers to think about peace, war and violence in radically new ways.

**"Are human beings naturally violent?"**

**"What is hatred?"**

**"How can love overcome the power of hatred?"**

**"How does nonviolence overcome the power of violence?"**

**"How can we prove that unconditional love makes us psychologically healthy and that hatred, just like an illness, occurs when something has gone wrong?"**

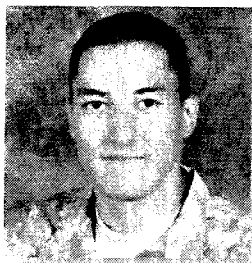

**"How does violence against the natural world relate to violence between human beings?"**

These are all questions that Captain Paul K. Chappell leads us to consider in a strikingly new way. In *Will War Ever End?*, Chappell demonstrates that human beings are naturally peaceful and that world peace can become more than a cliché. He lays out a practical framework for transforming the way we think about war and violence, enabling us to begin the real work we must do in order to achieve true peace for mankind.
